### CLIENT PROFILE:

JJ White Incorporated has a tradition of excellence in the Mid Atlantic construction industry that dates back to its founding in 1920 as a mechanical contractor.

### CLIENT CHALLENGE:

Due to their growth over the last few years, JJ White required additional space for their mechanical group. The mechanical group wanted their estimating group together in one 3,960 sq. ft. building but the existing offices did not have room for that objective. JJ White wanted to keep this group at their Philadelphia office but the property was close to full capacity.

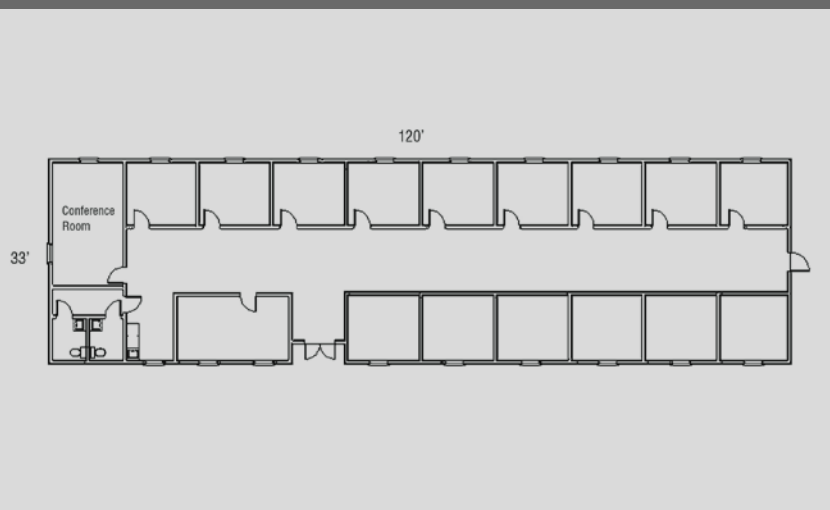

## THE MOBILELEASE SOLUTION:

Mobilelease sales and design team met with JJ White personnel in February, 2006 and reviewed the only available parcel of land and realized we could maximize the office space by customizing a long rectangular building which would include 15 private offices, one conference room, men's and women's bathroom, coffee bar sink area and long spacious hallway. JJ White supplied and installed the finish floor to enhance the overall quality of the finished product. The project was completed in less than 90 days.
